

Team collaboration has become a key part of the digital workplace landscape...!

Why? The work world is changing:

Mobility is a fact of life:

- 30% of employees are away from their desk more than 50% of the time.
- Over 55% feel that employees are more productive or as productive when mobile.²

And video is bringing people together:

- 55% of companies provide video solutions to all or nearly all of their employees.
- 64% indicated that video has improved productivity.²

Team Collaboration enables the modern work environment by providing multiple interaction modes in a single solution

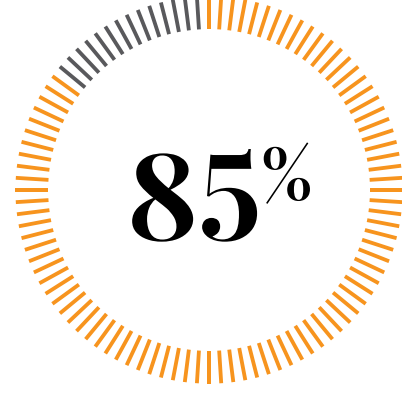

- 1 to 1 and 1 to Team Instant Messaging and Persistent Chat.
- Voice and Video Calling.
- Audio, Web and Video conferencing with recording.
- File Sharing and Storage.
- Task Assignment.
- Presence.

And its making a difference!

2/3 of those surveyed feel that Team Collaboration tools increase productivity.

Over 85% feel that having a single, integrated collaboration tool is important.²

But buyers have specific needs that must be met

Only 5% feel that investment protection is not important.

Only 11% want Premises-based solutions.²
