

## Fintech pioneer makes the switch to SIP with CCNA

CCNA worked with a leading Fintech organisation, known for innovating and disrupting the investment world since the start of the century. Over this period, the organisation has grown into a global powerhouse, utilising technology to securely align over a 1,000 institutional asset managers with investments and the liquidity to fund them.

With the compulsory shutdown of ISDN services across Australia, the fintech organisation had to move its services to SIP. They engaged CCNA to assist in this switch as their IT department is located in Asia.

CCNA has a proven track record of delivering communications solutions needed by the modern organisation, and they utilised this experience to provide the required switch to SIP. CCNA managed to overcome the challenges around coordinating locations in multiple countries while maintaining continual troubleshooting and support throughout the project and beyond.

This experience and focus on delivering the desired outcomes, as well as consistent, high-quality support throughout the project, ensured the organisation achieved its needed transformation without jeopardising their current systems in the process.

//

I would like to take this opportunity to thank Zac Randall and Sharon Lee for the assistance and contribution to this project. Much appreciated for their prompt and helpful responses together with good project management to deliver a successful outcome. Definitely will look for future business opportunities with CCNA.
